

Shackle & Suspension Systems

February 1, 2008

TMC 2008 ANNUAL MEETING & EXHIBITION PRESS RELEASE

URO® Systems introduces the ‘E’ Life Series Replacement Cartridges for Transverse and Longitudinal Torque Rods

*URO® Shackle & Suspension Systems has developed a product family of free rotational ellipsoid straddle mount and tapered torque rod bushings for a variety of applications. The “E” Life Series is designed to have high durability with increased service life 3 to 5 times over the original equipment bushings and other aftermarket supplier components. The “E” Life Series is designed to extend component life while improving overall vehicle handling as well as offering **LOWER MAINTENANCE COSTS**. The free*

rotational design of the URO® “E” Life Series System provides superior dampening and suspension control over the suspension system windup and corresponding frame rise. The “E” Life Series offers optimum performance for vehicles with air ride suspensions and severe service vocational suspensions.

URO® Systems offers a 3 year WARRANTY and a detailed coverage for most Class 6, 7 & 8 vehicle front and rear suspension ride solutions.

*Additionally, URO® Systems offers **MAINTENANCE FREE** Shackle Systems for front suspensions. The shackle system has a freely rotating spring pin design and a specially formulated elastomer. The rotational design of the URO® Front Shackle System extends component life and improves overall vehicle handling and ride quality as well as offering **LOWER MAINTENANCE COSTS & INCREASED SERVICE LIFE**. URO® Systems offers a 3 years **PARTS & LABOR WARRANTY** on all of its Front Shackle Systems.*
